

Gray Interface '26

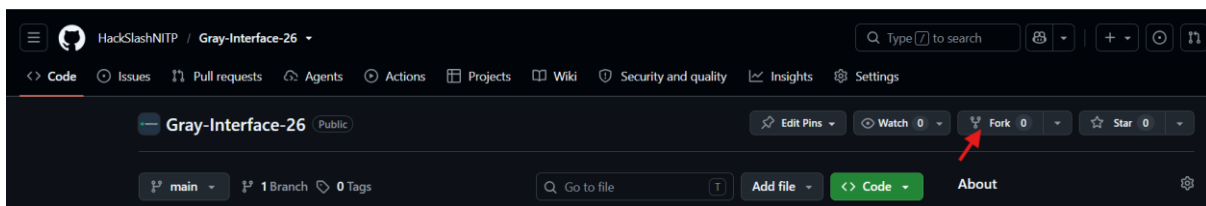

GitHub Submission Guidelines

This is the official GitHub repository where you'll be submitting all your assigned tasks:

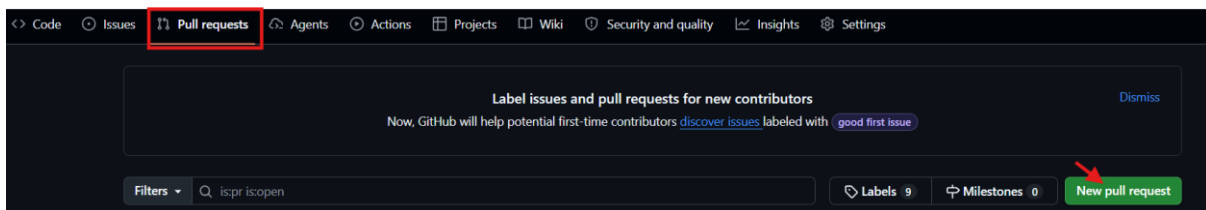

<https://github.com/HackSlashNITP/Gray-Interface-26>

Please follow these instructions carefully:

1. Fork the repository to your own GitHub account.

2. Clone your fork to your local machine using **git clone** command.
3. Complete your assigned task.
4. Track your files and commit your changes using meaningful commit messages using **git add** and **git commit** commands.
5. Work only inside your designated folder.
 - o Do NOT modify, rename, or delete files or folders belonging to your teammates.
6. Push your changes to your forked repository using **git push** command.
7. Open a Pull Request (PR) from your fork to the main repository.

Important Notes:

- Ensure your Pull Request contains only the changes related to your assigned task.
- Avoid committing unnecessary files such as IDE settings, cache files, or temporary files.
- Pull Requests that modify other members' folders may be rejected.
- If you encounter any issues related to Git, GitHub, forking, or the submission process, feel free to ask in the group.
